Ariana, Tunis — 2081, Tunisie

PROFILE

Full Stack Software Engineer with expertise in Web and Mobile applications, real-time systems (WebSockets/Socket.IO), and AI integrations (chatbots, NLP). Proven experience in startups and fintech environments: from scalable backend architecture (Node.js, Python, GraphQL, PostgreSQL) to high-performance user interfaces (Angular, React, Next.js, Tailwind). Focused on delivering business-centric dashboards and efficient, user-friendly experiences.

EXPERIENCE

- Binomial (Accounting Expertise)** Dec 2024 – Present
Full Stack Developer | Project: ChatCount (AI Chatbot) Paris, France — Tunis Office
 - Designed and developed **ChatCount**, an **intelligent assistant** enabling natural language interaction with FEC (accounting logs) databases for querying, filtering, and analytics.
 - Built an analytics engine combining **natural language processing**, structure recognition, and dynamic query generation for MongoDB.
 - Migration underway to GraphQL & Next.js** (planned May 2025) to ensure scalability and maintainability.
 - Stack:** Angular, Node.js, Python, MongoDB → GraphQL, Next.js.
- Easy Bank** Apr 2025 – Aug 2025
Full Stack Developer (Frontend-Focused) | Freelance Contract (4 months) Remote
 - Built a multilingual **admin dashboard** to manage banking services, users, and loan templates.
 - Implemented **dynamic forms**, custom **onboarding workflows**, and **real-time notifications** using Socket.IO.
 - Contributed to UX optimization with TailwindCSS and shadcn/ui component system.
 - Platform adopted by several banks for customer loan automation.
 - Stack:** Next.js, TailwindCSS, shadcn/ui, GraphQL, NestJS, Socket.IO, PostgreSQL.
- VOLO-BIKES** Feb 2024 – Aug 2024
Co-founder & Full Stack Developer — Graduation Project Tunisia
 - Launched a smart e-mobility platform for the MENA region, integrating web, mobile, and back-office interfaces.
 - Developed three modules: **e-commerce portal**, **mobile app** (subscription, billing, history), and **admin dashboard** (fleet & maintenance).
 - Implemented a real-time **GPS tracking system** using Mapbox and Socket.IO.
 - Integrated business analytics for KPIs, alerts, and heatmaps.
 - Recognized as a **startup project** and showcased in local innovation events.
 - Stack:** Angular, Ionic, Node.js, Redis, Socket.IO, Mapbox, PostgreSQL.
- Viribus Centre** Mar 2024 – Aug 2024
Part-Time Team Lead (Freelance) | Real-Time Analytics Dashboard Tunisia
 - Designed a real-time dashboard for managing appointments and BIM.
 - Deployed on AWS for scalability and improved operational decision-making.
 - Stack:** Angular, Node.js, MongoDB, AWS.
- Global ENR** Summer 2023
Summer Intern | Web Development Tunis, Lac 2
 - Contributed to the design of HR web tools, including a lightweight CRM.
 - Stack:** Spring Boot, Angular, MongoDB.
- ESPRIT - Mobile Department** Jun 2023 – Aug 2023
Summer Intern | Software Engineer Tunisia
 - Developed a file-reading chatbot using **ChatGPT API**.
 - Stack:** Python, Streamlit, Flask, MongoDB.

- **North Events** Jun 2022 – Aug 2022
Tunisia
Summer Intern | Web Developer
 - Developed frontend interfaces using React.js.
 - **Stack:** Node.js, React.js, MongoDB.
- **SNIT (National Real Estate Company)** Mar 2021 – Jun 2021
Tunisia
Final Internship (Bachelor) | Backend Developer
 - Developed a web and mobile legal case management app for litigation tracking, profile management, data migration, search, reporting, and alerting.
 - **Stack:** CodeIgniter, PHP, Express.js, React, Node.js, Doctrine2, MySQL.

PROJECTS

- **Chaos-Control — Real-Time Virtual Workspace** Jan 2023 – May 2023
Stack: Node.js, React.js, MongoDB, Solidity, Unity, Photon, IPFS
 - Enabled flexible, real-time remote collaboration in 3D environments..
 - Integrated **HR et logic and smart contracts** with an immersive Unity-based UX.
- **DevOps Automation — CI/CD and Code Quality** 2023
Stack: GitHub, Docker, Jenkins, SonarQube, STS, Angular, Spring Boot
 - Set up automated testing pipelines and code quality gates.
- **Frippy App (iOS & Android) — Social eCommerce** Sep 2022 – May 2023
Stack: Node.js, Kotlin, MongoDB, Socket.IO, Swift
 - Created a hybrid shopping app with **live streaming and chat features** to boost user engagement.

EDUCATION

- **ESPRIT School of Engineering** 2021 – 2024
Tunis, Tunisia
Engineering Degree in Software Development
 - Focus: Web and Mobile Development
 - Final GPA: **15.18/20**
- **Faculty of Sciences of Tunis El Manar (FST)** 2018 – 2021
Tunis, Tunisia
Bachelor in Computer Science
 - General Computer Science Program.

TECHNICAL SKILLS

- **Frontend** React, Next.js, Angular, Tailwind CSS, shadcn/ui, Ionic
- **Backend** Node.js, Express, NestJS, Python, GraphQL, REST
- **Data/DB** PostgreSQL, MongoDB, MySQL, SQL Server, Redis
- **Real-Time Systems** WebSockets, Socket.IO, Event-driven
- **DevOps** Docker, CI/CD, GitHub Actions, Jenkins, SonarQube, AWS
- **Quality & Testing** Unit testing, Clean code, Performance, Monitoring

LANGUAGES

Arabic: Native | French: Fluent (B2) | English: Intermediate (B2)

LEADERSHIP & INVOLVEMENT

- **IEEE ESPRIT Student Branch**, Program Manager 2022 – 2023
- **IEEE Computer Society SBC**, Program Manager 2021 – 2022
- **Infoplus FST Club**, Chairman 2019
